The result of greater foreign investment and greater foreign trade has been greater integration of production and markets across countries. **Globalisation is this process of rapid integration or interconnection between countries.** MNCs are playing a major role in the globalisation process. **More and more goods and services, investments and technology are moving between countries.** Most regions of the world are in closer

contact with each other than a few decades back.

Besides the movements of goods, services, investments and technology, there is one more way in which the countries can be connected. This is through the movement of people between countries. People usually move from one country to another in search of better income, better jobs or better education. In the past few decades, however, there has not been much increase in the movement of people between countries due to various restrictions.

LET'S WORK THESE OUT

1. What is the role of MNCs in the globalisation process?
2. What are the various ways in which countries can be linked?
3. Choose the correct option.
Globalisation, by connecting countries, shall result in
(a) lesser competition among producers.
(b) greater competition among producers.
(c) no change in competition among producers.

FACTORS THAT HAVE ENABLED GLOBALISATION

Technology

Rapid improvement in technology has been one major factor that has stimulated the globalisation process. For instance, the past fifty years have seen several improvements in transportation technology. This has made much faster delivery of goods across long distances possible at lower costs.

Containers for transport of goods
Goods are placed in containers that can be loaded intact onto ships, railways, planes and trucks. Containers have led to huge reduction in port handling costs and increased the speed with which exports can reach markets. Similarly, the cost of air transport has fallen. This has enabled much greater volumes of goods being transported by airlines.

CBSE Class 11 Economics NCERT Solutions

[Download Latest 11th Economics NCERT Solutions](#)

Economic activities, though, are grouped into three different categories, are highly **interdependent**. Let us look at some examples.

| EXAMPLE | WHAT DOES THIS SHOW? |
|--|--|
| Imagine what would happen if farmers refuse to sell sugarcane to a particular sugar mill. The mill will have to shut down. | This is an example of the secondary or industrial sector being dependent on the primary. |
| Imagine what would happen to cotton cultivation if companies decide not to buy from the Indian market and import all cotton they need from other countries. Indian cotton cultivation will become less profitable and the farmers may even go bankrupt, if they cannot quickly switch to other crops. Cotton prices will fall. | |
| Farmers buy many goods such as tractors, pumpsets, electricity, pesticides and fertilisers. Imagine what would happen if the price of fertilisers or pumpsets go up. Cost of cultivation of the farmers will rise and their profits will be reduced. | |
| People working in industrial and service sectors need food. Imagine what would happen if there is a strike by transporters and lorries refuse to take vegetables, milk, etc. from rural areas. Food will become scarce in urban areas whereas farmers will be unable to sell their products. | |

LET'S WORK THESE OUT

1. Complete the above table to show how sectors are dependent on each other.
2. Explain the difference between primary, secondary and tertiary sectors using examples other than those mentioned in the text.
3. Classify the following list of occupations under primary, secondary and tertiary sectors:
 - Tailor
 - Basket weaver
 - Flower cultivator
 - Milk vendor
 - Fishermen
 - Priest
 - Courier
 - Workers in match factory
 - Moneylender
 - Gardener
 - Potter
 - Bee-keeper
 - Astronaut
 - Call centre employee
4. Students in a school are often classified into primary and secondary or junior and senior. What is the criterion that is used? Do you think this is a useful classification? Discuss.

Wages: The income of workers in the unorganised sector is not fixed and they are barely able to meet the needs to lead a decent livelihood. Hence proper and fixed wages should be given to these workers so that they can grow and contribute to the growth of the country. For example – a painter only gets paid the wages for the days he works and on the other days, he is jobless and is able to earn nothing.

Safety: No safety is provided to the workers working in the unorganised sector. There is no job security and anyone can be fired and removed from their work as per the requirement of the labourers. For example – A labour working in the construction of a building works with no work once the construction is complete and has no guarantee of getting work again.

Health: Health is a very important factor for the growth and development of the country. The unorganised sector is given no medical security and if any accident occurs while they are working, the employer is not responsible for their health. For example – there is no sick leave for labourers working on daily wages.

23. A study in Ahmedabad found that out of 15,00,000 workers in the city, 11,00,000 worked in the unorganised sector. The total income of the city in this year (1997-1998) was Rs 60,000 million. Out of this, 32,000 million was generated in the organised sector. Present this data as a table. What kind of ways should be thought of for generating more employment in the city?

Answer: Table with 5 columns: Total Workers, Workers in Unorganised Sector, Total Income of City (1997-1998), Income generated by organised sector, Income generated by unorganised sector. Data: 15,00,000 workers, 11,00,000 unorganised, 60,000 million total income, 32,000 million organised, 28,000 million unorganised.

The table clearly shows that the income generated in unorganised sector is close to 50% of the total income of Ahmedabad. In order to increase employment opportunities for the people more industries should be set up, proper education must be provided to all and proper facilities under the public sector must be provided to all.
