Your Android phone has accidentally blocked and now worried about how to unlock it? Asking how to unlock the Android phone password without factory reset? If yes, this article will guide you completely. Here you will learn effective ways on how to unlock the Android phone password without losing data. Keep many data on your Android phone and you want to also secure it so that others cannot access the data from it. To avoid other accesses, the phone is fixed with a password. But several times, I saw that many users are blocked while unlocking the phone password. Now how to unlock the phone without a password is a big headache for many boys. But now there is nothing to worry about how in this tutorial, you will find out how to unlock the Android phone password without losing data is a serious question. Quick Methods: Method 1: How to unlock the Android phone password Without factory reset using the Android unlock tool if you don't know how to waste this situation, simply suggest you use the Android release tool. This is a professional tool that allows you to unlock your Android phone password without losing data. Using this tool, any type of password you used to lock the phone is unlocked without losing data. This is 100% safe and safe to use without any problems. This can be used for any Android smartphone that is blocked due to any reason. So it's the best option to unlock the Android phone password and simply suggest download the Android release tool and use it without any problems. No matter any Android phone brand uses like Huawei, LG, HTC, live or others, this powerful tool works effectively. If you are a HTC phone user and search how to unlock the forgotten HTC password phone without a factory reset or a LG phone user who looks out how to unlock the LG phone you have forgotten the password without losing data, this extraordinary tool is better to use. Method 2: Unlock the Android phone password using the device's "Find My Device" The device you are using if it is running on Android 7.1.1 or less, you have the possibility to use "Find my device" to unlock your phone and needs a Google account. Follow the following steps to unlock your Android phone: Step 1: First, go to [www.google.com/android/find](http://www.google.com/android/find) On your computer or any other phone. So Access Google Account> List of Android devices will be displayed signed with the account> Select the phone you want to unlock step 2: You will get the option "Ring, Block, cancellation". Choose Lock Option Step 3: When a popup message, set a new password Step 4: Now after having done it, access the phone previously locked and enter the new password. Now you can easily unlock your phone. The use of the best tool as Android data recovery will help you retrieve deleted data from Android after the factory reset. It is one of the best ways to retrieve each missing file after deleting the entire phone without keeping backup. Method 3: Bypass Android phone Using the operation of the "Forgot model model" You can also use the function "Forgot Pin / Pattern" to unlock the device. When you click this option, the lock screen will be displayed with a Google account or a backup pin. You may remember your Google account but remember that this option is only available on devices in Europe.
