MOVIE MAKER
MAKES MOVIES

iMovie example. iMovie maker templates. iMovie templates. iMovie text sur video. iMovie titre.

iMovie. It has come a long way since it first was introduced on Macs, though its simplicity and no-nonsense interface have remained. Yet nothing that's as user friendly as iMovie comes without its limitations, and with that comes frustrations. As it stands now, there are no ready-made templates for iMovie, and it doesn't look like that will change until Apple allows third-party projects. That being said, one of the main things people who use iMovie look for are themes and templates to help with projects. In this tutorial we'll explore how you can get around the limitations and use templating in iMovie. Sunflower pattern by panuruangan/Envato Elements. A Quick Word on iMovie and Final Cut Pro X One of my favourite features with Macs is that their applications are forward compatible from their ready-to-use apps like iMovie to their professional line of products, meaning you can load your project from iMovie into a Final Cut Pro X timeline. This opens up some interesting possibilities. I have found bartering skills to be a cost-effective and important part of freelance work. If there is a one-off project scene or standardized intro you need to complete for your channel, for example, try seeing if someone you know who has Final Cut and is willing to trade will trade you some time for yours in order to complete the sequence. You'd be surprised the success rate and long-time benefits of this. Just make sure to be clear with what you are after and that everything is tidy and in order to avoid souring relationships. How to Create a Template in iMovie Let's use an intro for your YouTube channel as a working example. For clarity, I'm sharing a method doesn't involve further deep editing once your sequence is completed. The idea is to create a sequence in your iMovie timeline that you can use for future videos by letting some of the media act as a placeholder, allowing you to easily switch things out without messing with existing transitions or parameters. iMovie comes with some stock transitions, text holders, and filters, and though they are a bit basic you can use them to make Title graphics that look nice. You also have the ability to keyframe in movement using the Transform feature to zoom in and out, pan left or right and tilt up and down, as well as alter some of the effects. With all of these things available, it is possible to create some basic project templates yourself. Make an Intro Template Dummy Project Bring your footage into iMovie and place your clips onto your Timeline, taking into consideration that you'll need to know which clips will be used as placeholders and if you need to add any keyframe animations to them. If you haven't added any additional features to your clip, you can simply drag your new clip over your exiting one and select Replace from Start. Once you've established your general edit, bring in Audio to help you edit with a rhythmic feel. Elements has a great selection of tracks to suit any mood. Now begin adding Transitions. Try using the Transform feature with "Ken Burns" (located just above the media player) to add movement. Next add text, if desired. More on this below. When you're ready, Save for future use. I recommend saving it as something you'll recognize, like "Intro Template." From there any time you need to use it all you have to do is duplicate your project by going to File > Duplicate Project, and you'll be able to work about freely on a copy without disrupting your original file. How to Work With Text in iMovie One of the biggest obstacles using iMovie is coming to terms with the way that some things in the program just are the way they are. Text in iMovie fades out, and while you can change the duration of the fade, that's as far as you are able to go. I have a couple of work-arounds to use. Create your titles in Keynote, and export them as .png image files to your second video track. iMovie only offers two tracks, so this can be a bit tricky and may require you to move things around. Edit the text in your favourite photo or graphics editor. Remember to always save with Save As so you'll be able to re-use the original and keep all the same formatting. If you decide to go with either of these routes, I'd recommend holding off on using the transform tool until the very last step. A general rule that I use is to flesh out the story before diving in on an animation. It has saved me lots of time and many headaches. That's it, Have Fun! As you can see nothing like this isn't without limitations. This can be fun and a great way to learn the ins and outs of iMovie, which are directly transferrable to Final Cut Pro - if you do eventually use the professional program it will feel familiar. One of the best things you can do for your editing is check out the tutorials here on Envato Tuts+. When you are ready or have found yourself craving more tools and options I'd recommend checking out a professional editing suite like Final Cut Pro, Premiere Pro or one of the other alternatives. Envato Elements is a powerful resource that can help you save time while improving the quality of your final projects. A monthly or annual subscription gains you access to a large library of tools, like courses here on Tuts+, and a giant catalogue of video templates, stock video, and music. All these help keep your workflow moving efficiently and the quality of your work top-notch. Christmas is one of the best times of the year! We get together with family members, put up decorations, exchange gifts, enjoy delicious food, and have a good time celebrating. It's a good idea to capture your wonderful Christmas moments with video. iMovie, along with other video editing software, provides themes and templates for occasions like holidays, sports, news, scrapbook, etc. The best iMovie Christmas themes make your videos funny and attractive. This article will show you how to get more iMovie themes and iMovie trailer themes in 2021. Basic Knowledge about iMovie and iMovie Themes iMovie is a free, easy-to-use, and powerful video editing app for Mac and iOS. In iMovie, you can create iMovie projects or Trailer projects. With the former, you are able to easily combine videos, photos, and audio to make your own movie. With the latter, you can follow a template to create a Hollywood-style movie trailer. iMovie 10, iMovie '11, and the previous versions offer a number of themes that are suitable for videos of different topics. Version 10 covers 14 iMovie themes, including Bright, Bulletin Board, Comic Book, Filmstrip, Modern, Neon, News, Newscast, Photo Album, Playful, Scrapbook, Simple, Sports, and Travel. How to Add iMovie Themes for Christmas Videos Although there aren't iMovie themes dedicated to Christmas, some of the existing themes are actually suitable for Christmas and the holiday season. Among them, Playful can be the best iMovie Christmas theme. The theme Playful uses bright color schemes, beautiful transition scenes, and a happy tune as the theme music. As mentioned above, iMovie is also available for iPhone and iPad with these great themes provided. When it comes to adding the iMovie Christmas theme on iPhone, the theme Playful can also be a good choice. Steps to add iMovie Christmas theme to your project: Launch iMovie on your Mac. Click on the "Projects" button in the upper-left corner of the interface and then select the "Create New" > "Movie". Drag one or more Christmas video clips into iMovie. Move them into the editing area. Click on "Settings" in the upper-right corner of the timeline > click on "No Theme", which will bring up a "Change Theme" window. Click the play button to preview iMovie themes, and apply one of them for your Christmas videos. You can effortlessly change the theme in iMovie. To remove a theme, just select the option "No Theme" from the "Change Theme" window. Tips: After an iMovie Christmas theme is applied, if the transition scenes don't show up, you can split the video into several parts. How to Add iMovie Trailer Themes for Christmas Videos iMovie trailer themes are very flexible, allowing you to easily customize your Christmas projects with professional-looking templates. There are 29 trailer themes/templates available for various types of videos, such as Action, Adventure, Holiday, Scary, Romantic Comedy, and Epic Drama. Among them, the "Holiday" genre is the most suitable iMovie trailer theme for Christmas. Steps to add iMovie Christmas trailer theme to videos: Open the iMovie app. Head over to "Project" > "Create New" > "Trailer". Scroll down and select the theme "Holiday". You are able to preview the iMovie trailer themes by clicking on the play button. Click on the "Create" button. Drag your Christmas clips into iMovie. Under the Outline tab, edit movie name, release date, cast, credits, and other information. Under the Storyboard tab, you can enter your Christmas clips by dragging and dropping. It tells you information like length, duration, and types of shots. You can also easily edit a selected clip by adjusting brightness, changing saturation, slowing down/up, etc. Tip: After adding the iMovie trailer Christmas theme and finishing editing, you can choose to convert the trailer project to a movie project for further editing. How to Get More iMovie Themes? Way #1 New iMovie Themes Download Although iMovie themes are free and versatile, it would be better if we could get more of them. The actual version of iMovie doesn't support third-party plugins. But you can buy and download iMovie Christmas themes from online sources, like: Just import the downloaded Christmas templates to iMovie and then start to custom iMovie themes. Way #2 Use Another Video Editing Software If you already have Final Cut Pro, Adobe Premiere Pro, DaVinci app, etc. installed on your computer, you can switch to them for more Christmas themes. Way #3 Burn iMovie Christmas Videos with Theme to DVD After using the iMovie Christmas theme and other features to edit and make your own Christmas movie, you can save it on your hard drive and share it with others. It's a good idea to burn it to DVD. Not only can it create a reliable backup of your Christmas videos, but allow you to distribute Christmas videos to friends and relatives conveniently. Meanwhile, most DVD burning software offers DVD themes and templates, so you will be able to get more themes for iMovie videos. iDVD was discontinued and not around anymore, Mac users can use its best alternative - Cisdem DVD Burner for Mac to burn iMovie to DVD so that the DVD videos can be played on any DVD player. This app has the ability to turn your Christmas videos into a high-quality DVD disc, folder, or ISO file with a Christmas menu theme, subtitle, and music. Steps to add DVD theme & burn iMovie Christmas videos: Step 1 Install Cisdem DVD Burner on Mac Download, install and launch Cisdem DVD Burner on your Mac. Free Download Then, insert a blank DVD into a DVD recorder drive. Step 2 Import iMovie videos to the program First, export the Christmas videos from iMovie. And then drag-n-drop the videos to the program. Step 3 Edit the iMovie videos (optional) Click (look like a pencil) under thumbnails to bring up the editing interface. Choose to crop/rotate your Christmas videos, create individual chapters, turn down/up the video volume, etc. Step 4 Add Christmas theme to iMovie videos Click the "Menu" button to go to the menu designing window. From the left panel, select Christmas iMovie templates. Besides Christmas Day, it also has rich templates for different topics, such as Halloween, Valentine's Day, Mother's Day, Thanksgiving, New Year, and so on. Christmas Template 1 Christmas Template 2 Although the software only contains 2 free iMovie templates for Christmas, it lets you import any downloaded or your own picture as background. Click at the bottom to add a new image. Below are two examples. Background Image 1 Background Image 2 Furthermore, click to display more menu tools, which help you edit text, replace the button, add background music for Christmas videos, etc. Step 5 Burn iMovie Christmas videos with Theme Come to the DVD output setting window > select "DVD Disc" as output format > preset output parameters > click on the "Burn" button. Here's a Video Tutorial: Export Christmas Videos from iMovie to YouTube, Facebook, etc. iMovie Christmas themes for movie and trailer projects can help you make your own holiday movie. After finishing it, you can upload it to YouTube and Facebook directly from iMovie. You can also save the video on your computer and then upload it to other platforms such as Dailymotion or Instagram. It's easy to do the exporting and uploading. You just need to click the export icon in the upper-right corner of iMovie main screen and select an export option. However, sometimes there can be problems. Each platform has its supported video upload formats among other requirements. If your iMovie video is in an incompatible format or is too big in size, you won't be able to upload it. This is when you need a video converter and compressor for Mac. Cisdem Video Converter can convert any video to the supported formats of YouTube, Instagram, and other sites. You can also use it to downsize your Christmas video for successful uploading. Conclusion In short, you are capable of making your own Christmas movie using iMovie themes, templates, and other features, and share the movie via Facebook, iCloud, and email. If you desire more iMovie Christmas themes, you can purchase and download them from online stores; alternatively, use another video editing software or DVD burning software to add new themes for iMovie videos.
