### 10.3 Practice B

Describe the shape of each distribution.

1. Runs Batted In

2. Test Scores

3. The frequency table shows the numbers of books read this month for the students in your class and the students in your friend's class.

Number of Books Read This Month	0	1	2	3	4	5
Your Class	0	3	6	8	7	6
Your Friend's Class	6	10	7	5	1	1

- Display the data for each class in a dot plot. Describe the shape of each distribution.
- Which class read more books? Explain.
- Which class has a greater mean? Explain.
- Which class has a lesser mode? Explain.

4. The table shows the number of videos rented each day.

Videos Rented									
54	61	43	48	14	21	51	42	35	
36	52	29	17	65	43	59	24	48	
42	62	36	29	19	58	51	47	42	

- Make a histogram of the data starting with the interval 10–19. Describe the shape of the distribution.
- During the following week, the number of video rentals were: 25, 37, 38, 31, 22, 35, 24. Make a new histogram including the new video rental data.
- Describe the shape of the new distribution.

Graph the following. The parent function,  $y = |x|$ , is the dashed graph.

1.  $y = |x + 3|$       2.  $y = |x + 1|$

Compare each graph with the parent graph. What do you notice?

What is the connection between the two equations?

What would you predict for the function  $y = |x - 4|$ ?

What about  $y = |x + 3|$ ?

Graph each of these equations.

3.  $y = |x - 1|$       4.  $y = |x + 2|$

Algebra II Chapter 7 Review Name \_\_\_\_\_ Date \_\_\_\_\_

1. Rewrite the expression  $2^{16}$  using radical notation.

2. Evaluate "the third root of 125".

3. Simplify  $16^{1/4}$ .

4. Solve:

A)  $\sqrt{x+1} = 10$       B)  $\sqrt{x^2+9} = 3$       C)  $\sqrt{x^2+4} = 0$

D)  $\sqrt{x+2} = \sqrt{x+4}$       E)  $\sqrt{x^2+16} = 4$       F)  $\sqrt{x^2+25} = 5$

5. If  $f(x) = 2x - 5$  and  $g(x) = \sqrt{x+1}$ , find  $f(g(3))$ .

### LESSON 10.6 Practice B

NAME \_\_\_\_\_ DATE \_\_\_\_\_  
For use with pages 611-617

Match the trinomial with a correct factorization.

- |                      |                      |
|----------------------|----------------------|
| 1. $2x^2 + 2x - 12$  | A. $(2x + 3)(x + 4)$ |
| 2. $2x^2 + 14x + 12$ | B. $2(x - 2)(x + 3)$ |
| 3. $2x^2 - 10x + 12$ | C. $2(x + 1)(x + 6)$ |
| 4. $2x^2 - 2x - 12$  | D. $2(x - 1)(x - 6)$ |
| 5. $2x^2 + 11x + 12$ | E. $2(x + 2)(x - 3)$ |
| 6. $2x^2 - 14x + 12$ | F. $2(x - 2)(x - 3)$ |

Choose the correct factorization. If neither is correct, find the correct factorization.

- |                      |                      |                       |
|----------------------|----------------------|-----------------------|
| 7. $2x^2 + 4x - 16$  | B. $5x^2 - 17x + 6$  | 9. $6x^2 - 17x + 5$   |
| A. $(2x + 4)(x - 4)$ | A. $(5x + 1)(x + 6)$ | A. $(3x - 1)(2x - 5)$ |
| B. $(2x + 8)(x - 2)$ | B. $(5x - 3)(x - 2)$ | B. $(3x + 1)(2x + 5)$ |

Factor the trinomial if possible. If it cannot be factored, write *not factorable*.

- |                       |                      |                       |
|-----------------------|----------------------|-----------------------|
| 10. $2x^2 + 11x + 15$ | 11. $3x^2 + 10x - 7$ | 12. $10x^2 + 13x - 3$ |
| 13. $10x^2 + 17x + 3$ | 14. $8x^2 + 2x - 3$  | 15. $3x^2 + 2x - 2$   |
| 16. $12x^2 + 16x - 3$ | 17. $4x^2 - 3x + 8$  | 18. $10x^2 - 9x - 9$  |

Solve the equation by factoring.

- |                            |                           |                          |
|----------------------------|---------------------------|--------------------------|
| 19. $6x^2 - 10x - 4 = 0$   | 20. $6x^2 - 27x + 27 = 0$ | 21. $3x^2 + 5x + 2 = 0$  |
| 22. $8x^2 + 10x + 3 = 0$   | 23. $4x^2 - 8x - 5 = 0$   | 24. $12x^2 - 5x - 3 = 0$ |
| 25. $15x^2 + 16x - 15 = 0$ | 26. $8x^2 - 22x + 5 = 0$  | 27. $6x^2 + 5x + 1 = 0$  |

28. **Summer Business** Your friend's weekly revenue  $R$  (in dollars) from her tie-dye T-shirt business can be modeled by  $R = -2t^2 + 37t + 60$  where  $t$  represents the week of sales, with  $t = 0$  for the first week. In the first week, 3 T-shirts were sold. After that, the sales increased by 2 T-shirts per week. Did the price of T-shirts remain constant during the 8-week summer season? Explain.

29. **Cliff Diving** A cliff diver jumps from a ledge 96 feet above the ocean with an initial upward velocity of 16 feet per second. How long will it take until the diver enters the water?

**CHAPTER 6**  
**Cumulative Review**  
For Lessons 6.1–6.7

Evaluate the expression. (Lesson 6.1, 6.2)

1.  $11 + 8 \cdot 2^2 - 8$       2.  $\frac{2}{3}[5 + 27 - 12]$       3.  $8t^2 - 3t$  when  $t = 3$

Check whether the given number is a solution of the equation or inequality. (Lesson 6.4)

4.  $3r - 11 = 15$ ; 4      5.  $9y + 3 < 13$ ; 2      6.  $3c - 8 \geq 7c - 11$ ; -2

Find the sum, difference, product, or quotient. (Lessons 2.7–2.8)

7.  $5 + (-13)$       8.  $-17 + (-2)$       9.  $13 \cdot (-12)$   
10.  $-7 - 11$       11.  $-\frac{1}{3}(15k - 8)$       12.  $\frac{32}{-\frac{5}{6}}$

Evaluate the expression. (Lesson 2.7)

13.  $\sqrt{169}$       14.  $-\sqrt{9}$       15.  $\pm\sqrt{256}$       16.  $\pm\sqrt{0.04}$

Solve the equation, if possible. (Lessons 2.1–2.4)

17.  $x + 7 = 19$       18.  $23 - j = 14$       19.  $7n - 11 = 10$

20.  $\frac{y}{4} + 8 = 13$       21.  $15j + 7j = 11$

22.  $14m + 7 - 8m = -17$       23.  $-3.6 + 4.3 = -1.9 + 3.7$

24.  $3(4k - 2) = 18k - 32$       25.  $\frac{1}{2}(9g - 8) = \frac{1}{3}(5g + 15)$

26. **Reading** A student can read 4 pages of a book in 5 minutes. How many pages can the student read in 60 minutes? (Lesson 5.6)

Use the percent equation to answer the question. (Lesson 2.7)

27. What percent of 35 is 15.2?      28. What number is 35% of 150?

29. At your school, 74% of students bought their lunch at the cafeteria. There are 1250 students in the school. How many students bought their lunch?

Solve the literal equation. (Lesson 2.6)

30. Solve  $ax + by = c$  for  $a$ .      31. Solve  $m - \frac{r}{5} = c$  for  $r$ .

Plot the point in a coordinate plane. Describe the location of the point. (Lesson 4.7)

32.  $A(3, 5)$       33.  $B(-2, -4)$       34.  $C(0, -3)$

REVIEW AND PRACTICE

Big ideas math algebra 2 chapter 1 test answers. Big ideas algebra 2 chapter 1 test answers. Big ideas math algebra 2 chapter 1 test.

You will also like: Complex numbers guided notes and practice @mathematicsprof/Twitter Some students love mathematics — others not so much. This makes mathematics important for more than one vote on a report card. This could work in a history class, but for mathematics, it is essential to really understand mathematical concepts to achieve long-term success. @mathematicsprof/Twitter Si Positive The brain of children is like sponges, and absorb all kinds of observations and suggestions from adults — both positive and negative. Do not forget to include a lot of time for questions and allow them to really understand the concepts before moving to the next topic. @mathematicsprof/Twitter Plan in advance For most parents, students bring home specific items such as tasks, and they simply need to be prepared to help with what they are given. They are much more likely to be excited about a task that you have given. Try to finish the problems that you can easily see related to the work functions you will perform, regardless of their level. Mathematics can feel a bit abstract when they are young, but it involves skills that will need in life long after they are out of school. If you experience double as you go, you may not get through all the test, which can drastically lower your score, although all you have done is correct. There is also a handwritten key. The topics covered are: Chapter 1: Families, transformations, solve linear systems with 2 and 3 variables Chapter 2: Quadratic transformations, inoizauqE inoizauqE actardauQ al erevlosiR :3 olotipaC ehcitardauQ inoizauge elled artutircs e ozzilitU Using square roots and manufacture; Quadratic formula and the discriminant, complex numbers, problems of vertical movement words chapter 4: add and remove polynomes, divide polynomes using the long division and/or the synthetic division my students are able to finish this exam in about one ' Now at an hour and a half. I included the PDF file and a Word version for printing and modification facilitates. This is the culmination of a revision system that I do with my students to prepare for the half-yearly exam on chapters 1-4. Francesco Ridolfi/Istock/Getty Images read all the instructions for the entire test before doing any problem. It is a half-yearly exam complete with scan for Big Ideas Math Algebra 2 (Larson/Boswell) Chapters 1-4. As a result, some can try to move away only by doing the minimum naked to obtain a degree of passage. Catherine Yeulet/Istock/Getty Images ask your potential employer exactly what kind of mathematics will be on the work of working mathematics. Cookai/Istock/Getty images check your job only when you completed all possible questions. Don't let them do it! Instead, lift the bar with even larger challenges to send a powerful signal that always expect to do their best. These do not provide any response to test questions, but they can help you choose how to solve a given equation. @Mathcoachcorner / Twitter encourage the curiosity, the great ideas in mathematics tend to naturally inspire the curiosity, but the curiosity is a precious tool also for the basic concepts. When they arrive at the exam, they are completely practiced and ready to be successful. My students say that my reviews are despened and prepare them perfectly for the exam. I give a chapter a day, then I give two days for them to make the "total review", o o ovoun noc odnataia elats il odnau otultarpos otmenom ingo ni ednamod el e Atsioiruc al ereiggarooni id ivetarucissa. tset ius itrolaocac id osu/llus oroval id erotad elazinotop out il noc allortnoC concepts. This gives you a direction for your preparatory study and prevent you from studying material that does not be present. Build confidence some students who fight to understand some concepts of mathematics are discouraged and they start believing that mathematics is not simply for them because they are not good. Above all, remain positive and does not express a negative attitude that is likely that your child imitates. In fact, some students find that mathematics is difficult and does not like so much so that they do everything possible to avoid it. These tests are fundamental for positions in fields such as accountability in which mathematics is needed to serve customers or employer. They feel so if they do not understand all the ways in which mathematics refers to daily life in the real world - so show them! Apply equations, formulas and geometry to common tasks that can see and participate helps students understand how important mathematics is in our life. If you are not sure where to start, take a look at these ways tested over time to help students with mathematics. Therefore, it is likely that your potential employer make you take math tests of employment as part of the application process and interview. Being tired and hungry can hinder your concentration and increase the probabilities that you will make useless errors. The Giambra/Istock/Getty images make the simple problems first. These are the mathematical qualities that are the foundations for other math -related tasks. @Mathcoachcorner/Twitter customizes the numbers of mathematical assignments sometimes work in very interesting ways. @MensxMoney/Twitter gives the priority to understanding, not to storage in the academic world, sometimes too much emphasis is placed on the storage of information for exams. The teachers should itnangesi itnangesi iuc ad adiuq anu eredeihc orehbervod-onu a 'Aip esab us asac a eratuia da itatini illeug etnemlareneg onos ehc-irotneg i ertnem ,essale ni ottaf onnah ehc 'Aic etnemattase us irotineg i itamroini inform them of any problem areas that are particularly challenging. DoneAAAAt put off giving them rewards for their hard work! They shouldneAAAAt have to wait until they achieve big things like getting AeAAAAs on report cards and outstanding test scores. Even if you start to feel frustrated yourself, take a short break to relax and then seek guidance from online sources or another person to help you figure it out. @MathCoachCorner/Twitter Additionally, letting their curiosity guide them gives them a chance to discover their own passions for the particular subjects they may enjoy most. In order to continue enjoying our site, we ask that you confirm your identity as a human. If you can't bring one with you to the test, you'll have to brush up on your manual math much more and should work a little harder on mental math practice. For example, if you are going for an architecture job, you may need more algebra than someone who is applying for a retail clerk position. Estimate as you work so you quickly can check whether your final answer is close. Work to build confidence from the outset eAAA perhaps with a fun game that reinforces beginning math concepts eAAA to ensure you take that fundamental first step to helping your child learn and succeed. Giving students some control over how they learn allows them to adapt and incorporate their strengths, and it also conveys your belief in their ability. To pass an employment math test, you have to properly review and get some basic information from your potential employer about the test content. If you doneAAAAt encourage understanding over memorization from the beginning, students could find themselves on shaky foundations as the math gets progressively harder. If you are allowed to bring a calculator, program in a few notes with some basic formulas you may need to remember. It eAAAAs critical to be vigilant about what you say when it comes to talking about math and helping them with it. Soon, there means that some problems can be solved in a way. When it is so, it is essential to look at the topics that students must know for their exams and it takes some early planning to make sure to cover them in detail. In the world of sport, this often presents itself in the form of medals or trophies. Reward your student while you go with simple but interesting delicacies such as the creation of a mathematics game to play on a computer or a mobile device instead of a normal study session. Although it is certainly true that some students include the concepts of mathematics more quickly than others, everyone can learn mathematics with the right techniques and tools. Whether you are a parent who helps your child at home or a teacher in the classroom, face the process with the right teaching methods can make a big difference. For example, instead of giving them an exercise or work sheet to complete, you could prepare several exercises and let them choose what they want to do. However, teachers and parents who follow a curriculum follow. Update your basic mathematical qualities such as working with multiplication or percentages, esteem and reading tables. So move on to the most difficult ones. @Mathcoachcorner/Twitter Progress Prize regardless of the subject you are working with your child or student, it is important to reward progress. @Mathcoachcorner/Twitter applies mathematics to the scenarios of the real world when you talk to the students, it becomes clear that one of the key problems with mathematics for many of them is that it seems too abstract for them. For example, if you know that 75 percent of the test uses multiplication, you will surely want to pass through your tables. Tables.

210 AD: Negative numbers are accepted as numeric by the late Han-era Chinese text The Nine Chapters on the Mathematical Art.
