How to create a dataframe in r from csv

When working with your data in R, you eventually want to save it on the disc. This will allow you to work with the data later and still hold the original dataset. You can also allow you to share your data set with other analysts. Before learning to save a data set in R, it is a good idea to create a sample data set. The following script creates a data frame r [explained in another topic of this learning infrastructure] for you to practice the economy. X
