Imusa electric espresso maker manual. Imusa 6 cup manual stovetop espresso maker.

Best reviews The most recent Top 124s: When production stops, press OFF (0). Disconnect the unit and allow the coffee to cool. Make sure the switch is in OFF position (0). Check that the coffee pot is not hot, and unscrew it by holding the boiler with one hand and turning the broth clockwise with the other. To prepare six cups of coffee, remove plugs and fill the boiler with fresh water until you reach the safety valve (visible inside the boiler) without filling it further. Insert the plunger into the boiler and fill the plunger with ground coffee without compressing it. To prepare three cups of coffee, fill the boiler with water about two centimeters below the safety valve. Insert the 3-cup adapter into the plunger and fill the plunger with ground coffee without compressing it. Note: Do not use coffee without water in the boiler. Also do not put hot water in the boiler for faster operation. Distribute the ground coffee evenly and remove any excess coffee from the edge of the filter. Note: Use good quality, medium ground coffee. Tighten the coffee machine securely. Hold the boiler with one hand and rotate the drill clockwise with the other, without pushing on the handle. Put the coffee maker on the base. Close the lid. Connect a standard CA socket from 120 times. Press the ON switch (1). The light will indicate that the coffee is on. Attention: Do not open the lid to the water tank during the

production process as heating may occur. Coffee will begin to be released after a few minutes. When production stops, press the OFF switch (0). A disconnected unit and allow the coffee to cool.
